HIGHER MACHINERY QUOTES

The new farm machinery order
issued by the Price Board July
increased quotes for many
recently quoted for many

turners and importers for the
next twelve months.

The order provides for a supply
of farm equipment of total
tonnage to approximately 75 per
cent of the average of 1940-41
output, and represents an increase
of about 150 per cent over
supplies provided by the previous
farm machinery control.

It also establishes preferential
provisions on the basis of 50 per
cent of the 1940 and 1941 average
output.

The board announcement said
the total program provided will
be approximately 75 per cent of the
average total weight of machines,
repairs and attachments supplied
in the 1940 and 1941 periods.

Reasons for the new order
were increased food production
goals, loss of farm machinery,
put into effect last October, will
be continued to ensure fair dis-
tribution and the maximum use
of every piece of new equipment.

The number of kinds of machi-
nery and equipment which has
been manufactured has been about
doubled, although only the most
desirable items will be produced
or imported.

For the prairie provinces, the
production of potato and corn
planters, two-furrow plowing
plows, potato diggers, feed mix-
ers, aerated or surface type milk
coolers and watering equipment will
be permitted.

The strength of the Canadian
forces in Sicily has been
disclosed, but the fact that sol-
diers of the Dominion were chosen
to fight with Montgomery's de-
sert veterans speaks volumes.

Only the attack on Dieppe broke
nearly four years of training
during which the Canadian citi-
zen army was trained to fight a
powerful striking force. Major-
General Guy Simonds of Toronto,
is the commanding officer.

THE WORLD OF WHEAT

By G. G. STANLEY
Director, Research Dept., Statist. Div., C. I. B.

Government Should Buy All Wheat

Over and over again we have
heard that there is a shortage of
flour in the world, and that
millers produce of wheat is the
most valuable commodity for the
war and peace programs of the
United Nations. Now we hear the
United States is becoming frigh-
tened that there may even be a
shortage of wheat in the U.S.A.
The recent International Conference
at Hot Springs, Virginia, has actually
recommended that the govern-
ment increase production of wheat
in Canada, including wheat.

Considering all this, it hardly
seems fair that our wheat farmers
should be asked to raise some 200
million bushels of surplus wheat on
their farms at their own risk and
cost, and for which at the present
time is no market, and on which
they cannot recover money.

I suggest that the Government
should make a declaration that,
within any two years, they will
either purchase this surplus farm
product or it will be called upon to
become available or that they will
make a substantial cash advance on
it. Thus farmers who are pressed
for cash to meet their taxes will
be able to borrow some cash on
good surplus wheat as they now hold
in mill bins on their farms.

More Farm Machinery

Farm implement manufacturers
in the United States have been al-
located 800,000 tons of surplus steel
to permit an enlarged production of
farm machinery during the year
terminating July 31. Manufacturers
will be authorized to produce 400
percent of farm equipment in quan-
tities equal to the total tonnage pro-
duced in 1940 and 1941, whichever
was higher.

Canadian farmers are vitally in-
terested in the United States action,
because the production of farm ma-
chinery are usually imported into
Canada from the U.S.A. It is not
clear just whether an increase in
surplus shipments into Canada will
be allowed by the U.S. government.

Engraved across a wind-up clock
last week's edition of the
Chronicle was a 500,000 lb. of wheat
from Argentina and 50,000 lb. of wheat
from Australia.
